

# Oklahoma Foundation for Medical Quality Pressure Ulcer Root Cause Analysis

Floor/Unit \_\_\_\_\_ Resident/Patient Age \_\_\_\_\_  
Primary Diagnosis \_\_\_\_\_ Secondary Diagnosis \_\_\_\_\_  
Site of Ulcer \_\_\_\_\_  
MDS Coding Identified as \_\_\_\_\_  
Date Ulcer first identified \_\_\_\_\_ Ulcer Stage when identified \_\_\_\_\_

Circle Below Where You Think Break-Down First Occurred:  
Home Hospital Skilled Facility Current Facility Other

Risk Assessment Done on Admission? (Circle) Yes No  
If yes, score \_\_\_\_\_ Tool Used \_\_\_\_\_

Frequency of Risk Assessment \_\_\_\_\_  
(LTC best practices for risk assessment: Once in first 24 hours, then weekly 4 times a week)

Yes, consistently \_\_\_\_\_ Sometimes \_\_\_\_\_ No \_\_\_\_\_

Risk Assessment Score Consistent with Resident/ Patient Status as Document in Medical Record?  
Yes \_\_\_\_\_ No \_\_\_\_\_

### If Patient Found at Risk:

Prevention protocol initiated immediately? Yes \_\_\_\_\_ No \_\_\_\_\_

### Trunk Wound:

Age of Pressure Redistribution Surface Resident/Patient is Currently On: \_\_\_\_\_

Does your facility use foam (eggcrates) on top of mattress? Yes \_\_\_\_\_ No \_\_\_\_\_

Resident/ Patient on Appropriate Surface? Yes \_\_\_\_\_ No \_\_\_\_\_ Date Placed on Current Surface: \_\_\_\_\_

Residents/Patients in Prolonged Seating Positions: How often is weight shifted and documented?  
\_\_\_\_\_

Is Resident/Patient Able to Reposition Themselves? Yes \_\_\_\_\_ No \_\_\_\_\_

Turned and repositioned every 2-3 hours and documented? Yes \_\_\_\_\_ No \_\_\_\_\_

Does staff routinely check for "bottoming out"? Yes \_\_\_\_\_ No \_\_\_\_\_

Skin Status Documented at Least Daily? Yes \_\_\_\_\_ No \_\_\_\_\_ Partial \_\_\_\_\_ Is Resident/Patient Incontinent \_\_\_\_\_

Barrier Cream in Use and Documented? \_\_\_\_\_ Does resident/patient wear disposable briefs? \_\_\_\_\_

Catheter in use? Yes \_\_\_\_\_ No \_\_\_\_\_

**Nutritional Status:**

Resident/Patient Weight\_\_\_\_\_

Nutritional Consult? Yes\_\_\_\_\_ No\_\_\_\_\_ Not Indicated\_\_\_\_\_

Additional Lab Available: Alb level\_\_\_\_\_ Date Obtained\_\_\_\_\_
Pre-Alb level\_\_\_\_\_ Date Obtained\_\_\_\_\_
Glucose Level\_\_\_\_\_ Date Obtained\_\_\_\_\_

Resident/Patient Taking Any of the Following: (Circle) Prednisone Blood Thinners

**Heel Ulcer**

Heel elevation consistently maintained? Yes\_\_\_\_\_ No\_\_\_\_\_ Partial\_\_\_\_\_

Is wound arterial, venous or diabetic? Yes\_\_\_\_\_ No\_\_\_\_\_

If yes, circle all appropriate above.

Support stockings/ SCDs removed at least bid and skin status documented? Yes\_\_\_\_\_ No\_\_\_\_\_ N/A\_\_\_\_\_

Has resident/patient been off unit/out of facility greater than 4 hours within the last 3 days? Yes\_\_\_\_\_ No\_\_\_\_\_

If yes, when, where and how long?\_\_\_\_\_

**Barriers Identified**

Family\_\_\_\_\_

Equipment/Supplies\_\_\_\_\_

Cost\_\_\_\_\_

Staffing\_\_\_\_\_

Education\_\_\_\_\_

Lack of product/equipment company representative support?\_\_\_\_\_

High acuity of residents/patients within facility\_\_\_\_\_

**Conclusions**

\_\_\_\_\_ All appropriate preventative measures implemented, ulcer unavoidable
\_\_\_\_\_ Gaps noted in prevention measures
Specify\_\_\_\_\_
\_\_\_\_\_ Ulcer mostly likely began with resident/patient off unit or out of facility
\_\_\_\_\_ Equipment not available

**Comments/Recommendations in policy/procedure of care:**
