# Your Trusted Resource
## for ICD-10-CM/PCS

## Will You Be Ready?

In October 2015, the next implementation of the International Classification of Diseases-Clinical Modification/Procedure Classification System (ICD-10-CM/PCS) will impact healthcare across all settings. Are you ready? The transition will be a significant undertaking for those who want to avoid claim rejections and payment delays. OFMQ is your local, trusted healthcare consulting services company, and we are ready to help.

## How We Can Help You

OFMQ can provide you with an effective, well-organized training that will help your billing staff select the correct clinical diagnosis and procedural codes for claims submitted to Medicare and private insurance payers. Since early preparation is key, we invite you to take advantage of our services now. We have AHIMA approved ICD-10-CM/PCS trainers who will provide your organization with a comprehensive education experience including hands-on coding practice sessions and new ICD-10 code books. Additionally, our early training modules* include a free coding refresher session. The anticipated benefits of ICD-10 include:

**Higher-quality data**
- Improved ability to measure the quality, efficacy, and safety of patient care
- Increased sensitivity when refining grouping and reimbursement methodologies
- Enhanced ability to conduct public health surveillance

**Improved efficiencies and lower administrative costs**
- Increased use of automated tools to facilitate the coding process
- Decreased claims submission and claims adjudication costs
- Fewer miscoded and rejected claims
- Decreased need for manual review of EHRs to meet data extraction needs

Maximize your training to include OFMQ's on-site support, which is a customized add-on. We will work with you and your staff on-site to identify and minimize potential problems during your ICD-10 transition. Our technical experts can also help with troubleshooting billing errors in your EHR system. Contact OFMQ for more details on our ICD-10 training and transition assistance programs.

*applies to training modules purchased before December 31, 2014*
